Just Gets Better and Better / 5 Stars

"This series keeps getting better and better! Book 5 has it all: action, adventure, characters that become friends and it sometimes comes too close to real life. Definitely have to read this one!"

A Great Read! / 4 Stars

I just finished The Blue and Silver Shark. It's my favorite of the series so far, and coincidentally, I started it as the Boston Marathon is on the news every day. Your writing style and character development get better with each book and I can't wait to read the next one! I appreciate the insider view on motorcycle clubs as I do not ride but I can relate to the themes of loyalty and respect.

Another great story from Winterhalder and Teatum! / 5 Stars

This is the 5th book in the Skuldmens series but only the second one I've read. While the Silver and Blue Skuldmens Motorcycle Club is weaved into both, the main characters are different in each book. This was an easy but interesting read with a tight plot, realistic scenes, and believable characters that I CARED about. Easily worth the time and money spent and I'm glad I did.
